CULTURAL AND PALEONTOLOGICAL RESOURCES
WEEKLY MONITORING SUMMARY REPORT

WEEK OF OCTOBER 21, 2012 to OCTOBER 27, 2012

CULTURAL RESOURCES MONITORING

Construction work was conducted Monday through Friday of this week. Earth moving activities occurring throughout the week consisted of the excavation of trenches and drilling in the Switchyard. On Monday, Tuesday, Thursday and Friday, these activities were accompanied by the excavation of DC trenches, DC whips, trenches in intersections, and backfilling within Block 17 of the Construction Phase 2 Area. On Tuesday through Thursday additional activities consisted of ground wire intersections and backfilling in Block 16 of Construction Phase 2 Area. Additional activities on Wednesday consisted of the excavation of AC trench in Block 20, compaction in Block 16, backfill in Block 17, an excavation of holes through the tortoise fence for biological activities, all within the Construction Phase 2 Area. Additional activities on Thursday and Friday consisted of blade soil grading in Block 16 of Construction Phase 2 Area. On Thursday, additional activities consisted of soil prep in Block 12 of Construction Phase 3 Area. On Friday, all previously listed earth moving activity was accompanied by delineators in southern basins.

No ground disturbing activities were conducted on Sunday (10/21) or Saturday (10/27). All activities were monitored by Cultural Resources and Tribal monitors and no new finds were recorded this week.

PALEONTOLOGICAL RESOURCES MONITORING

Paleontological monitoring was conducted during excavations for trenches, vaults, whips, and other earth-moving activities in paleontologically sensitive Pleistocene Nonmarine sediments (Qc) and Quaternary alluvial sediments (Qa) Monday through Friday of this week. No new fossil resources were recovered this week.
