CULTURAL AND PALEONTOLOGICAL RESOURCES
WEEKLY MONITORING SUMMARY REPORT

WEEK OF NOVEMBER 11, 2012 to NOVEMBER 17, 2012

CULTURAL RESOURCES MONITORING

Construction work was conducted Tuesday through Friday of this week. Activities were not conducted on Monday in observation of Veteran's Day. Earth moving activities occurring throughout the week consisted of the excavation of trenches in the Switchyard. On Tuesday through Thursday, this activity was accompanied by site preparation and vault excavation in Block 3 of the Construction Phase 3 Area. Additional activity on Tuesday and Wednesday included monitoring the staking of the Gen-Tie Line. Tuesday through Thursday, excavation in Block 17 of the Construction Phase 2 Area included whips, AC Trench, DC trench, DC connections to vaults, combiner boxes. Tuesday through Thursday, excavation in Block 20 of the Construction Phase 2 Area included combiner boxes, DC connections to vaults, AC trench, DC trench, and whips. Additional activity taking place on Tuesday and Thursday included the collector line road expansion in Block 4 in the Construction Phase 3 Area. Thursday's additional activity consisted of monitoring the expansion of the collector line road in Block 14 of the Construction Phase 4 Area, monitoring Gen-Tie activity in the Desert Center Dump, and auguring in Entry Boulevard and Westside Drive. Additional activity on Friday consisted of auguring for the collector line road.

No ground disturbing activities were conducted on Sunday (11/11), Monday (11/12) or Saturday (11/17). All activities were monitored by Cultural Resources and Tribal monitors and no new finds were recorded this week.

PALEONTOLOGICAL RESOURCES MONITORING

Paleontological monitoring was conducted during excavations for trenches, vaults, whips, and other earth-moving activities in paleontologically sensitive Pleistocene Nonmarine sediments (Qc) and Quaternary alluvial sediments (Qa) Tuesday through Friday of this week. No new fossil resources were recovered this week.
